

## Clark Forklift Part

Clark Forklift Part - Performing globally, there are at this time 350,000 Clark forklifts and lift vehicles in operation, with in excess of 250,000 of those in commission in North America. Clark has five main lines of forklifts across the world, making it one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 exclusive brands of lift trucks, with components covering more than 120,000 specific parts for all of its automated equipment. Your regional Clark Seller is your complete source for availability of all your components requirements offered by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently stationed in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Driven to supply the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to improving efficiency and benefiting performance.

Internationally, Clark has one of the most impressive supplier support networks. With over 550 locations worldwide, seller representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of modernization in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is now a customary feature on every lift truck.

Clark has a uncompromising goal to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its manufacturing plants. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any environmental restrictions, thus placing them in a prevailing market position.

Clark has chosen the structure of "Lean Production" at all of its assembly plants because this technique is particularly economical and enables minimal use of resources. Developed to ensure maximum proficiency, this system is intended to find and acknowledge the most effective methods for manufacturing facility stewardship. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers join together to upgrade the efficiency and excellence of their products while minimizing costs. The contemporary value engineering agenda combines progressive product improvement and offers superior consumer support and service within the industry.
